

ASSOCIATE IN SCIENCE IN CHEMISTRY FOR TRANSFER (AS-T)

Students completing the Associate in Science in Chemistry for Transfer will be able to seamlessly transfer into the CSU system to pursue a baccalaureate degree in Chemistry. Students completing this degree will have an introductory foundation for the field of Chemistry through the study of atomic structure, thermodynamics, orbital theory, inorganic and organic chemistry, reaction mechanisms, stoichiometry, instrumentation and laboratory protocol. Students will acquire skills and abilities in using standard laboratory equipment, evaluating data and critically assessing conclusions, learning and applying scientific concepts and developing critical thinking skills.

Program Outcomes

- Demonstrate critical thinking and logical reasoning skills by applying appropriate theories and techniques to solve quantitative problems.
- Demonstrate critical thinking and logical reasoning skills by applying appropriate theories and techniques to solve qualitative problems.
- Collect, record, organize, and analyze experimental data and recognize the limitations of measurements.

Transfer & Career Opportunities

This Associate in Science in Chemistry for Transfer (AS-T) Degree is intended to meet the lower division requirements for chemistry for all CSU campuses. Students planning to transfer to institutions other than the CSU are encouraged to consult ASSIST.org (<http://www.assist.org>) and a COS counselor for program planning and course selection. Most common career opportunities with a baccalaureate degree include: chemical lab technician, water purification technician, quality control coordinator, and general laboratory work.
